Minor in General Business

FULL STACK WEB DEVELOPMENT CERTIFICATE • University of Arizona • 2020
Recently Completed 240 Program Hours

CODE IN PLACE • Stanford University • 2020
CS106A: Programming Methodologies

EXPERIENCE

FREELANCE WEB DEVELOPER • Wolfpack Web Dev • 2020 – Present

After completing classwork and obtaining certifications, I have been working on projects to continue to gain experience in web development.

MERCHANDISING EXECUTION ASSOCIATE • The Home Depot • Jan. 2019 – Dec. 2019

After relocating to be closer to home, I took a role that would allow me to tend to the needs of my family. My responsibilities as part of the Merchandising Execution Team included resetting bays, general bay service, and store projects such as seasonal displays.

SPECIMEN RESOLUTION LEAD • Millennium Health • 2014 – 2018

At Millennium Health, I started in the drug testing lab utilizing my problem-solving skills to address defects identified by the production team. Eventually, I moved to the genetic testing lab to implement my processes there. After establishing the Specimen Resolution Department in the genetic lab, I was promoted to a leadership role and returned to the drug testing lab to oversee a team of 8 specialists. I also worked closely with IT department to implement a web-based order tracking system.

IT RECRUITER • Foothills Consulting Group • 2012 – 2013

I was the lone recruiter in the San Diego territory for the privately-owned IT staffing firm based in Burbank, CA. This position gave me great experience in dealing with deadlines and delivering quality results while discussing many technologies (web development, frontend, backend, etc.) with industry professionals.

MATERIAL COORDINATOR • Qualcomm • 2010 – 2012

After earning my degree, I began my career as a temp in the Supply Chain Operations organization. This position provided me the experience of working in a fast-paced production environment as part of a team. I was quickly hired as a full-time employee and given a promotion to coordinate an order tracking system using Oracle ERP, MRW, and other technologies.
