Objective

I am looking to obtain a Web Developer position based on my growing knowledge, skills and ability acquired over time and throughout a coding bootcamp. I hope to contribute as part of a team or showcase my abilities on my own, whichever is most desired.

Education

The University of Arizona (2009)

- ▶ B.S. Regional Development
- ▶ Minor in General Business

Experience

The Home Depot - Queen Creek, AZ (Jan. 2019 – Dec. 2019)

Merchandising Execution Associate

After relocating to be closer to home, I took a role that would allow me to tend to the needs of my family. My responsibilities as part of the Merchandising Execution Team included resetting bays, general bay service, and store projects such as seasonal displays.

Millennium Health – San Diego, CA (2014 – 2018)

Specimen Resolution Lead

At Millennium Health, I started in the drug testing lab utilizing my problem solving skills to address defects identified by the production team. Eventually, I moved to the genetic testing lab to implement my processes there. After establishing the Specimen Resolution Department in the genetic lab, I was promoted to a leadership role and returned to the drug testing lab to oversee a team of 8 specialists.

Foothills Consulting Group – San Diego, CA (2012 – 2013)

IT Recruiter

I was the lone recruiter in the San Diego territory for the privately-owned IT staffing firm based in Burbank, CA. This position gave me great experience in dealing with deadlines and delivering quality results.

Qualcomm – San Diego, CA (2010 – 2012)

Material Coordinator

After earning my degree, I began my career as a temp in the Supply Chain Operations organization. This position provided me the experience of working in a fast-paced production environment as part of a team. I was quickly hired as a full-time employee and given a promotion to coordinate an order tracking system.

Skills

- ▶ JavaScript, Python, HTML, CSS, React, Django, MongoDB, MySQL, NodeJS, ExpressJS
